Audiobook Production

Overview

eBookIt.com / Archieboy Audio Production connects publishers to the world's largest audiobook distribution network. We provide access to over 38 unique outlets and support six active business models. Royalties are calculated as a percentage of Publishers' Retail or Library List Price, except where noted.

Our Business Models

1. Unlimited subscription: Customers pay a flat monthly price to subscription service for unlimited access to audiobooks. A sale occurs each time a subscriber consumes 15% or more of the audiobook.
2. Credit-based subscription: Customers pay a flat monthly price to subscription service for credits allocating them a fixed number of audiobooks per month. A sale occurs each time a customer uses a credit to access an audiobook.
3. Pay-per circulation: For Audiobook sales that permit Library patrons to borrow access to a digital audiobook for a specific period of time that is automatically terminated upon expiration of the lending period or return of the digital audiobook. Allows for unlimited circulation of licensed copies with access being limited to one (1) patron per borrowed copy.

For library partners offering Pay Per Circulation (except as noted below), pricing will be set as follows:

SLP of \$15 and under = \$.99

SLP of \$15.01 to \$25 = \$1.99

SLP of \$25.01 and above = \$2.99 .

Overdrive sets pricing for this model as 8% of Publisher's Library Price or \$.99, whichever is greater.

For circulations of content on **hoopla**, royalty payouts will be generated based on the total duration of the content, as outlined in the table below:

<u>Duration in Minutes</u>	<u>Royalty Payout</u>	<u>Duration in Minutes</u>	<u>Royalty Payout</u>
0-90	\$0.24	541-660	\$0.84
91-180	\$0.34	661-780	\$0.99
181-300	\$0.49	781-960	\$1.14
301-420	\$0.64	961-1080	\$1.24
421-540	\$0.74	1081-9999	\$1.34

4. Pool subscription: Customers pay a flat monthly price to access a subscription service which contributes to a shared revenue pool. Royalties paid based on Publisher's pro-rata share of total audiobook listening for each monthly period.
5. Combined Portions Model: combines portions of an audiobook consumed to determine sales of Audiobook Titles. Combined Portions Model (CPM) pays publishers off of Digital List Price after 5 portions of a title have been consumed by subscription end users. A "portion" equals one fifth of an Audiobook Title. A unit purchase will be recorded for each 5 portions consumed of an Audiobook title, across any number of Users.
6. A la carte: In the retail channel, a customer purchases a license to the title in a traditional a-la-carte purchase environment. In the Library Channel, a school or library purchases a license to the title that may be circulated to one (1) patron at a time
